

## 950 Angle Valve

- **Advanced two-piece internal assembly offers upper diaphragm protection and reliable lower seat operation, providing long-term durability and performance under the toughest conditions**
- **Self-cleaning metering rod system ensures that only “clean” water enters the upper diaphragm chamber, offering consistent performance and increasing diaphragm lifespan**
- **All EPDM rubber parts outlast commonly used Buna-N parts when exposed to dirty water**
- **Consistent design across model options allows for ease of installation and serviceability, making the 950 a “Superior” long-term value**
